PROFILE

Aspiring Software Testing Engineer with a focus on software quality assurance, defect tracking, and continuous improvement of application performance. Interested in manual and automation testing to ensure reliable and bug-free software delivery. Eager to learn industry-standard testing tools and contribute to high-quality software development in real-world projects.

EDUCATION

Bachelor of Technology in Computer Science Engineering Vignan's Nirula Institute of Technology and Science for Women • CGPA: 8.1	Expected 2027
Intermediate (Class XII) Dr. B.R. Ambedkar Gurukulam • Percentage: 86%	2021 – 2023
SSC (Class X) Dr. B.R. Ambedkar Gurukulam • Percentage: 83%	2021

EXPERIENCE

Purple Technologies (PTS) IoT Intern	May 2025 – July 2025
- Completed a 2-month internship focused on Internet of Things (IoT) concepts, gaining practical exposure to smart devices, automation systems, and real-time applications. - Worked on device integration and explored communication between hardware components while improving technical and problem-solving abilities through hands-on learning.	

PROJECTS

Hand Gesture Controlled Home Appliances IoT, Sensors, Automation	May 2025 – June 2025
- Designed and developed a hand gesture-based home automation system capable of controlling electrical appliances efficiently through gesture recognition and automation concepts. - Implemented sensors and microcontroller technologies for real-time device interaction, improving automation efficiency and reducing manual operation.	
Community Service Survey Project Data Collection, Analysis	May 2025 – June 2025
- Conducted a survey on awareness of central government schemes and analyzed public participation in welfare programs within local communities while interacting with people from different backgrounds. - Collected, documented, and analyzed survey data systematically to understand public awareness levels and participation in government welfare initiatives.	

RESEARCH & PATENT

LSTM-Based Real-Time Anomaly Detection Framework for Future Wireless Networks
- Presented a research paper focused on real-time anomaly detection in future wireless networks using Long Short-Term Memory (LSTM) models and deep learning techniques. - Analyzed network traffic behavior, intrusion detection mechanisms, model accuracy, precision, recall, and performance comparison with traditional machine learning algorithms. - Studied cybersecurity challenges in 5G/6G environments and explored intelligent anomaly detection methods for secure wireless communication systems. - Patent Publication: Contributed to innovative technology research and documentation as part of academic technical exploration and problem-solving activities.

TECHNICAL SKILLS

Programming Languages: C, Python, SQL
Tools & Platforms: VS Code, GitHub, Pycharm, MS Office
Technical Concepts: IoT, Automation, Problem Solving, Analytical Thinking
Soft Skills: Quick Learner, Communication, Team Collaboration, Defect Identification

CERTIFICATIONS

- NPTEL – Human Computer Interaction (Gold Elite)
- NPTEL – Joy of Computing Using Python (Elite)
- CodeChef – Programming Certificate (500 Difficulty Rating)
- Infosys Springboard – Basic Course Completion Certificates
- Wadhvani Foundation – Ignite India Program
